Summary

Frontend React Developer with a strong foundation in building responsive and interactive user interfaces using **React.js** and modern JavaScript (ES6+). Passionate about clean code, performance optimization, and delivering smooth user experiences.

Graduate of **Zagazig University, Faculty of Computers and Information**, eager to join a professional frontend team, grow technically, and contribute to high-quality web applications.

Education

Zagazig University

Bachelor's degree in computer science

September 2020 – July 2024

Experience

Software Engineer | Academic Project

Zagazig University | August 2023 - July 2024

- Launched a cutting-edge LMS featuring facial recognition capabilities; streamlined attendance processes for over 500 students annually while making crucial academic services readily accessible through one user-friendly platform interface. During my time on the Academic Project, did
- Engineered a face-recognition LMS to streamline attendance tracking, serving 500+ users concurrently.
- Optimized database queries, cutting retrieval time by 50% and improving overall system performance.
- Designed a scalable database with 10,000+ records to accommodate future growth.
- Delivered a fully responsive UI, compatible with all tested devices, enhancing accessibility by 100%.
- Reduced manual course management time by 40% through automation.

Projects

Cinema-Scope

Technologies: ReactJS, Redux Toolkit, Tailwind CSS, SwiperJS, Axios

Source Code [🔗](#) **Live Demo** [🔗](#)

- Developed "CinemaScope", a responsive movie discovery platform built with React and external movie APIs.
- Implemented categorized browsing by genres and countries, allowing users to explore movies by interest or origin.
- Integrated detailed movie pages featuring trailers, cast info, and ratings for a complete viewing experience.
- Added search functionality with dynamic filtering to quickly find movies across different categories.
- Enhanced UX/UI with smooth transitions and responsive design for all screen sizes.

To-do List

Technologies: *Html, CSS, JS*

Source Code [🔗](#) **Live Demo** [🔗](#)

- To-Do List App A simple and responsive task management web app built using HTML, CSS, and JavaScript.
- It allows users to add, edit, delete, and organize tasks efficiently using an intuitive drag-and-drop interface.
- The project focuses on DOM manipulation, event handling, and local storage to save tasks and maintain user progress even after refreshing the page.
- Implemented light and dark modes for improved user experience

Tic-Tac-Toe Game

Technologies: Html, CSS, JavaScript

[Source Code](#) [Live Demo](#)

- Developed an interactive Tic Tac Toe game using JavaScript, HTML, and CSS with a clean and user-friendly interface.
- Implemented score tracking for each player and draws, with the ability to reset all results.
- Utilized LocalStorage to persist game data across sessions, ensuring continuity and enhanced user experience.

Product Management System

Technologies: Html, CSS, TypeScript

[Source Code](#) [Live Demo](#)

- Created a Product Management System featuring a comprehensive form for adding products with field-level validation to ensure correct data types.
- Implemented a product display and statistics dashboard, showing total products, total units, total quantity, and average price, providing users with clear insights into their inventory.
- All data is stored in LocalStorage, allowing users to edit or delete products while maintaining data persistence across sessions.

Story

Technologies: Html, CSS

[Source Code](#) [Live Demo](#)

- Story website is to enhance my front-end design skill

WindFlow

Technologies: ReactJS

[Source Code](#) [Live Demo](#)

- Built a responsive Weather Application that fetches real-time weather data from an external API.
- Optimized API requests and state management for fast and efficient data rendering.

Ecommerce-Api | Backend

Technologies: NodeJS, Express, MongoDB

[Source Code](#)

- Developed a full-featured E-Commerce web application with product CRUD operations and secure user authentication.
- Implemented role-based access control with separate dashboards and permissions for Admin and User.
- Integrated JWT authentication for secure login, logout, and registration processes.
- Protected sensitive routes and API endpoints using middleware and token verification.
- Optimized API and database operations for fast, reliable performance.

Technical Skills

- **Languages:** JavaScript, TypeScript, HTML5, CSS3
- **Frameworks & Libraries:** React.js, Redux Toolkit, React Router, React Hook Form, Tailwind CSS, Material UI (MUI), Bootstrap, Swiper, Axios
- **Tools & Platforms:** Git, GitHub, Vercel, Vite, VS Code

Certifications

- Frontend Web Development – ITI (2023) 
- Learn HTML & CSS - Mahara Tech (2025) 
- React JS - Mahara Tech (2025) 
- Node JS (RESTful Web Services with Node.js, Express, and MongoDB) - Mahara Tech (2025) 

Languages

- **Arabic:** Native
- **English:** Intermediate

Soft Skills

- Problem-solving
- Teamwork
- Analytical
- Communication
- Creativity
- Quality
- Securityawareness
- Organized
